The **NEW Performance Filmworks Edge™ System** provides a unique combination of performance, flexibility and precision. The **Edge™** is the newest generation of gyro-stabilized camera heads and remote arms in the marketplace, and is a turnkey solution for all your filming needs. Upon arrival on your set, the **Edge™** is completely assembled and ready to go. Just back it out of its custom-built transport, mount the camera and you're ready to roll.

The Standard **Edge™** System consists of:

- The Supercharged Mercedes ML 55 Camera Car
- The **Edge™** Head: 3-Axis, Gyro-Stabilized, Remote Controlled Camera Head
- The **Edge™** Head can be operated using Standard Joysticks, Wheels or Panbar Systems
- The **Edge™** Crane: Gyro-Stabilized, Roof-Mounted, Remote Controlled Camera Crane
- Optional Accessories including Spray Deflectors, Preston Lens Control Systems and Multiple Crane Extensions giving you a reach of 8- to 26-feet.
- Our office will coordinate your crew.
- One phone call and you're all set!

The technological advances incorporated into the new **Edge™** System provide a new level of speed, performance and stability, which surpass all other equipment available. The **Edge™** Crane can be quickly transformed on set into multiple different lengths, ranging from 8-feet all the way to 26-feet, and can be mounted on any vehicle, including cars, picture vehicles, trucks, SUV's, boats, etc. Such flexibility in a roof mounted remote arm has not existed in the industry until now. These improvements, combined with increased stability of the **Edge™** Head, have further heightened the performance response. The **Edge™** Head can accommodate any camera system, including 3-D systems and multiple camera arrays.

Performance Filmworks has an extensive fleet of purpose-built vehicles including the signature Supercharged Mercedes ML55, the Chevy Suburban, the Audi A6 Quattro, the Toyota Tundra Off-Road Truck and other specialized vehicles including watercraft, quads, and motorcycles. Additionally it has developed specialty rigging gear including suspension mounts, helicopter mounts and 3-D leveling heads to further complement and expand the capabilities of the **Edge™** Systems. However unique the demands of your production may be, Performance Filmworks is a one-stop shop for all of your camera motion equipment needs.

--Off-Road Edge System--

Performance Filmworks is an organization defined by the skills, talent and experience of our Team. We strive to provide our clients with not only cutting edge equipment, but also the best customer service in the industry. On set, our crew of highly experienced drivers, crane operators, camera operators, and technicians are dedicated to getting you the exciting footage you need. Our office staff is composed of experienced production professionals who are trained to flawlessly provide whatever informational and logistical assistance you may require.

Our duty to our clients is to provide equipment and personnel that you can consistently rely upon. Which is why we rigorously maintain our gear and train our crews to use the package to its fullest potential; to get you the ungettable shot, the unthinkable angle, the footage that gives you a competitive advantage. And with offices located in the US, Canada and Europe, Performance Filmworks is geographically positioned to help with your equipment needs wherever your next job might take you.

We are always happy to demonstrate the extensive capabilities of our cars, cranes and heads in an effort to show you how the Performance Filmworks *Edge*™ can help you get the footage you're looking for.
